

Micro **PowerPACS**[®] for Veterinary

Integrated Turnkey PACS Solution Utilizing Konica CR Technology

The Konica Minolta CR technology and VETinfo SYSTEMS' software create a perfect combination for a winning digital turnkey solution. This product package is provided with VETinfo SYSTEMS' world-renown and industry-acclaimed service assistance and 24/7 technical support.

VETinfo SYSTEMS has selected Konica Minolta to introduce a fully integrated digital turnkey solution to the Veterinary Market. This combination will enable practices to generate and acquire x-ray images through Konica Minolta's advanced CR technology features, including automatic veterinary algorithms, and will be managed by VETinfo SYSTEMS' Micro PowerPACS (MPP) for Veterinary. VETinfo SYSTEMS and Konica Minolta's exceptional reputations in the medical industry make this superior partnership a winning choice for all veterinary practices.

The complete digital turnkey system can directly acquire not only CR images, but also dental images using VETinfo SYSTEMS' advanced dental software module. The system can import, export, and store a variety of images from multiple modalities, including dental, CR, DR, ultrasound, endoscope, and more. The software then incorporates all images into one centralized worklist in MPP for Veterinary. Employing the Konica Minolta CR Reader and VETinfo SYSTEMS' dental software with MPP creates a seamless digital turnkey solution in one computer hardware, saving time and money for any practice. Veterinary practices no longer need multiple software programs and computers, because the new integrated solution covers it all.

Our customers see considerable savings in time and costs by purchasing fewer software programs and requiring less training time for end-users. In addition, less hardware is required, since the entire process, from image acquisition to diagnosis, can take place on one computer. Additional workstations can be added in different exam rooms to view the images in multiple areas of the practice, and remote access is also available for any practice to access images and reports off-site.

MPP for Veterinary DICOM Viewer

All installation and training for the entire integrated digital system, including PACS, CR, and other software programs from VETinfo SYSTEMS, is provided by VETinfo SYSTEMS on-site. Now, instead of trying to schedule appointments and communicate with different vendors, there is one remedial source to meet all of your needs-VETinfo SYSTEMS handles it all, dynamically serving the end-user and the practice.

MPP Veterinary DICOM Viewer

About VETinfo SYSTEMS

VETinfo SYSTEMS is a division of RADinfo SYSTEMS, focused solely on the Veterinary and Equine Markets. VETinfo SYSTEMS has developed dynamic digital software solutions to enhance patient care in the veterinary industry, forging the future of how veterinarians will use digital imaging to advance their methods of diagnosis and treatment.

Digital imaging technology has transformed the veterinary industry, enabling veterinarians and veterinary radiologists to provide faster, more accurate diagnoses than ever before. VETinfo SYSTEMS brings a unique outlook to digital imaging, launching a full range of Windows-based, DICOM-compliant software that combines images with associated patient/study data and transmits them to the veterinarian's workstation, improving the delivery of both routine and emergency patient care. VETinfo SYSTEMS offers DICOM solutions that will integrate its products with veterinary practice management systems and multiple modalities, thereby eliminating the need for multiple software programs and databases. These easy to use software systems improve workflow and efficiency, adding value to each customer's practice.

Top Rated Technology

KLAS and MD Buyline both ranked the Konica Minolta Medical Imaging CR No. 1 for the last several years in overall system performance and reliability.

The Konica CR product has many specialized features:

Konica Minolta CR reader:

- Small and compact, making it a perfect fit into any practice; less than 3 sq. ft.
- Cassette loading from front or side
- 60 plates/hour (14'x17')
- 0% mechanical interference with IP
- Unique linear technology with fewer moving parts

Konica Minolta Imaging Plates:

- Konica Minolta plates are strong and lightweight
- Image plate is never touched by the plate reader
- 100% iodine in phosphor composition = high x-ray absorption
- 2 years warranty on imaging plates, regardless of usage
- Longer life of plates because of the patented rigid image plate, which is contact free within the CR reader, eliminating the risk of image artifacts

Automated Vet Algorithms:

- No need to select 'body parts' for specific image processing algorithms, which prevents mistakes
- Processing parameters are automatically determined based on bone and tissue density
- Konica is the first and only CR reader with this advanced technology

Additional Product Features:

- User operated cassette release handle to remove jams, virtually eliminating service calls
- Optical Unit Sweeper enables self-maintenance for excellent image quality and extends product lifetime, preventing hair from entering and clogging the system
- Unique linear motor technology, with fewer moving mechanisms for reliability and longer life

Product Details:

- REGIUS 110 Nano CR Reader
- Two 14'x17', two 10'x12' cassettes/plates
- Imaging station
- 500 GB storage
- 21" wide screen high-resolution monitor
- Exam acquisition and review
