- Long Term Archiving and Rapid Disaster Recovery
- Enables Medical Professionals and Patients Restricted Access to Images
- Monthly Subscription for Medical Imaging Archiving and Services
- Integration of EMR and EHR to Patient Medical Images
- Secure Encrypted Data Storage

PowerPACS™ Cloud

The screenshot displays the PowerPACS Cloud interface. At the top, there are navigation tabs for 'Workflow', 'Worklist', 'Settings', and 'Logout'. Below these is a search bar and a 'Show 100 entries' dropdown. The main content area shows a table of patient records. The first record is for 'Doe, Johanna' with Patient ID 178566 and Last Study 03/19/2009. Below the table, there are two detailed study views. The first study view for 03/19/2009 shows a thumbnail image, four PDF files labeled 'sample.pdf', 'test_1.pdf', 'test_2.pdf', and 'test_3.pdf', and a 'Services' button. Below this are buttons for 'Upload Report', 'Burn CD', 'Download Study', 'Assign', and 'Notes'. The second study view is for 'FLOYD, JANE' with Patient ID 10758 and Last Study 02/10/2009. It shows three thumbnail images and four PDF files labeled 'sample.pdf', 'test_1.pdf', 'test_2.pdf', and 'test_3.pdf', along with a 'Services' button and the same set of action buttons.

PowerPACS™ Advanced Cloud Services

Upload and Attach Reports

Allows the user to upload any type of files to the patient's study.

Burn Patient CD

Allows the user to create DICOM CDs with a RSVS viewer.

Download Study

Allows the user to download full DICOM compliant diagnostic quality images.

Study Assignment

Assign image studies to designated users that gives full access to that patient file.

Teleradiology

Provides tools for medical professionals to transmit DICOM data between the cloud and local systems.

Chat

Allows a user to live chat on-line with another user.

View High Definition (HD) Image

Allows the user to view images in HD format.

About RADinfo SYSTEM™

Established in 1993, RADinfo SYSTEMS develops and supports Cloud computing, Windows-based, DICOM-compliant software for PACS, Teleradiology and image/information systems management. With products installed at hundreds of locations throughout the world, RADinfo SYSTEMS is also a systems integrator, bundling our software with modality and hardware manufacturers' products to provide complete information and image management solutions backed by around-the-clock technical support. In addition to developing the interface software that exist on modalities today, the privately held RADinfo SYSTEMS supplies software products and system development for many major modality and healthcare product vendors.
